

CHEM 269 Melting Point (MP)/Cyclohexene (CYC) Schedule. SPRING, 2014.

Because of a limited number of melting point devices, during lab 2 some sections will do the MP lab and some will do the Cyclohexene lab. During lab 3 you will do the exp that you did not do during lab 2.

All OWLS for both experiments are due at the same time.

Find your schedule below according to your locker number. Locker numbers are stamped on your locker key. The letter on your key is not important for this, just the number.

MP = MELTING POINT LAB CYC = CYCLOHEXENE LAB

Lockers 1-48 are in lab modules closest to the atrium lobby.

Lockers 49-80 are in lab modules furthest from the atrium lobby.
