

Physical Chemistry
Principles and Applications in Biological Sciences, 4th Edition
Tinoco, Sauer, Wang, & Puglisi

Chapter	Topic	Page	Lec
1	Introduction		
	The Human Genome and Beyond	4	
	Transcription and Translation	6	
	Ion Channels	10	
	References, Suggested Reading, Problems	11	
2	The First Law: Energy is Conserved	15	
	Energy Conversion and Conservation	16	
	Describing the State of a System	29	
	Phase changes	45	
	Chemical Reactions	47	
	Molecular Interpretations of Energy and Enthalpy	56	
	Summary	57	
	Mathematics Needed for 2	60	
	References, Suggested Reading, Problems	61	
3	The Second Law: The Entropy of the Universe Increases	69	
	Historical Development of the Second Law: The Carnot Cycle	69	
	A New State Function, Entropy	73	
	The 2 nd Law of Thermodynamics: Entropy Is Not Conserved	75	
	Molecular Interpretation of Entropy	77	
	Measurement of Entropy	81	
	Chemical Reactions	81	
	Third Law of Thermodynamics	82	
	Gibbs Free Energy	87	
	Helmholtz Free Energy	97	
	Noncovalent Reactions	97	
	Use of Partial Derivatives in Thermodynamics	106	
	Summary	111	
	References, Suggested Reading, Problems	111	
4	Free Energy and Chemical Equilibria	121	
	Chemical Potential (Partial Molar Gibbs Free Energy)	122	
	Reactions of Gases: The Ideal Gas Approximation	125	
	Nonideal Systems	130	
	The Equilibrium Constant and the Standard Gibbs Free Energies of the Reactants and Products	141	
	Galvanic Cells	153	
	Biochemical Applications of Thermodynamics	159	
	Biological Redox Reactions	170	
	Summary	176	
	Mathematics Needed for 4	179	

	References, Suggested Reading, Problems	179	
5	Free Energy and Physical Equilibria	187	
	Phase Equilibria	188	
	Membranes	213	
	Active and Passive Transport	227	
	Colligative Properties	231	
	Molecular-Weight Determination	239	
	Summary	241	
	References, Suggested Reading, Internet, Problems	244	
6	Molecular Motion and Transport Properties	253	
	Kinetic Theory	255	
	Molecular Collisions	265	
	Diffusion	267	
	Sedimentation	279	
	Determination of Molecular Weights from Sedimentation and Diffusion	285	
	Viscosity	289	
	Electrophoresis	291	
	Size and Shape of Macromolecules	301	
	Summary	302	
	References, Suggested Reading, Problems	307	
7	Kinetics: Rates of Chemical Reactions	315	
	Kinetics	316	
	Reaction Mechanisms and Rate Laws	341	
	Temperature Dependence	354	
	Transition-State Theory	357	
	Electron Transfer Reactions: Marcus Theory	360	
	Ionic Reactions and Salt Effects	362	
	Isotopes and Stereochemical Properties	363	
	Very Fast Reactions	372	
	Photochemistry and Photobiology	374	
	Photosynthesis	378	
	Summary	381	
	Mathematics Needed for 7	387	
	References, Suggested Reading, Problems	387	
8	Enzyme Kinetics	401	
	Enzyme Kinetics	403	
	Michaelis-Menten Kinetics	406	
	Competition and Inhibition	415	
	Summary	423	
	Mathematics Needed for 8	425	
	References, Suggested Reading, Problems	425	
9	Molecular Structures and Interactions: Theory	437	
	The Process of Vision	438	
	Origins of Quantum Theory	441	

	Quantum Mechanical Calculations	446	
	Schrödinger's Equation	449	
	Particle in a Box	455	
	Tunneling	463	
	Simple Harmonic Oscillator	465	
	Rigid Rotator	468	
	Hydrogen Atom	469	
	Electron Distribution	470	
	Molecular Structure and Molecular Orbitals	489	
	Intermolecular and Intramolecular Forces	493	
	Noncovalent Interactions	497	
	Molecular Dynamics Simulation	514	
	Outlook	516	
	Summary	517	
	Schrödinger's Equation	518	
	Some Useful Operators	518	
	Mathematics Needed for 9	522	
	References, Suggested Reading, Problems	523	
10	Molecular Structures and Interactions: Spectroscopy	531	
	Electromagnetic Spectrum	532	
	Color and Refractive Index	533	
	Absorption and Emission of Radiation	535	
	Proteins and Nucleic Acids: Ultraviolet Absorption Spectra	548	
	Fluorescence	554	
	Optical Rotatory Dispersion and Circular Dichroism	567	
	Circular Dichroism of Nucleic Acids And Proteins	573	
	Vibrational Spectra, Infrared Absorption, & Raman Scattering	576	
	Nuclear Magnetic Resonance	579	
	Interactions in Nuclear Magnetic Resonance	583	
	Summary	598	
	References, Suggested Reading, Problems	601	
11	Molecular Distributions & Statistical Thermodynamics	615	
	Binding of Small Molecules by a Polymer	616	
	The Random Walk	628	
	Helix-Coil Transitions	636	
	Statistical Thermodynamics	645	
	Summary	659	
	Mathematics Needed for 11	662	
	References, Suggested Reading, Problems	662	
12	Macromolecular Structure & X-Ray Diffraction	667	
	Visible Images	668	
	X Rays	668	
	Determination of Molecular Structure	684	
	Electron Diffraction	698	
	Neutron Diffraction	699	

	Electron Microscopy	700	
	Summary	704	
	Mathematics Needed for 12	707	
	References, Suggested Reading, Problems	708	
	Appendix	712	
	Answers	725	
	Index	728
