## 9:05a sectionEvening Exam \#3v1

## Updated 4/28/04 10:15am

This exam is composed of $\mathbf{2 5}$ questions. Go initially through the exam and answer the questions you can answer quickly. Then go back and try the ones that are more challenging to you and/or that require calculations.

As discussed on the course syllabus, honesty and integrity are absolute essentials for this class. In fairness to others, dishonest behavior will be dealt with to the full extent of University regulations.
